Methodology

Introduction: Analyze and compare the performance of Israeli companies with NASDAQ indexes using data from Yahoo Finance and Finder.

Data Collection: Gather historical data on indexes and tickers, spanning from January 1, 2014, to May 15, 2024.

Data Preparation: Load data, define date ranges, and create comprehensive date DataFrames for analysis.

Data Processing: Fetch historical prices, calculate market caps, handle missing data, and adjust for data distortions.

Analysis and Output: Calculate metrics like market capitalizations and index values, and save results to Excel for further research and insights.
